## LIQUID LIVING

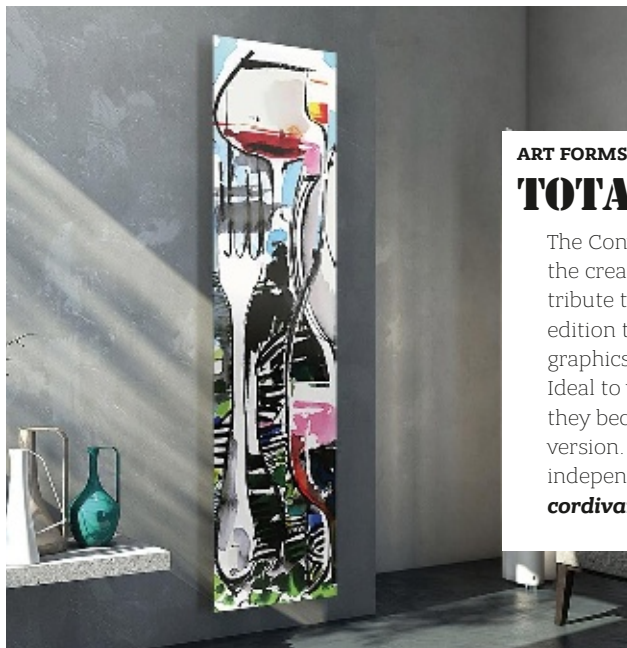

*INTERNATIONAL ENGLISH ISSUE*

LIGHT ALUMINIUM

## AESTHETIC AND FUNCTIONAL QUALITY

The new Book radiator by Caleido rethinks the role of heating elements in the home, transforming them from simple sources of warmth into decor objects. Designed by Marco Piva, it introduces a new material for the company: aluminium. An excellent heat conductor, the aluminium sheet has one or two slight bends at the extremities to add lightness and sculptural impact to the radiator. Available in a range of finishes, sizes and colors, it can be installed in residential settings and public facilities. Measurements: 800H X 500L; 1200H x 500L; 1600H X 500L. Finishes: available in all the colors of the Caleido RAL range. Hydraulic or electric models.

ART FORMS

## TOTAL COLOR

The Convivium radiators by Cordivari Design, from the creative verve of the artist Mariano Moroni, are a tribute to the Universal Exposition of 2015. A special edition that reflects the themes of the Expo, with fresh graphics that focus on Mediterranean food culture. Ideal to warm up the atmosphere in the dining room, they become protagonists when used in the triptych version. The series, however, is made so every piece is an independent work, also for individual display.

CHAOS AND ORDER

## RHYTHMICAL SEQUENCE

Piano Move by Ridea is a thermohydraulic system with appealing design that offers an innovative solution in the heating sector.

The parts are inclined, alternating protruding and recessed movements in a rhythmical sequence of great aesthetic impact.

Designed by Meneghello Paoletti Associati, the project has a strong personality, developed to be the protagonist of large spaces and to add character to smaller rooms. Made in recycled aluminium, the unit reduces weight and calls for a low quantity of water, guaranteeing rapid heating.
